

Wireless Solutions to Increase Efficiency & Productivity

Instant Staff Notification

Wireless Push Button Paging

Truck Driver Paging

Forklift Paging

Instant Staff Notification

Enhance staff productivity

Ensures messages are received in loud environments

No Monthly Fees

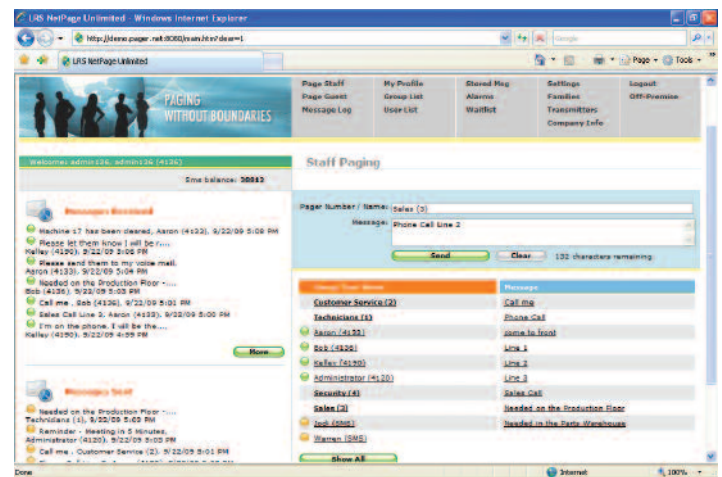

Instant notification enables quick response times

Reduce equipment downtime by locating service techs faster

Reduce on-hold hang-ups

Page individuals or an entire group

Eliminate disruptive overhead paging

Netpage Unlimited Screen

Contact Staff Instantly From Your PC With NetPage Unlimited

Maintaining constant contact between manufacturing employees can be a daily challenge. Improve efficiency and productivity in manufacturing operations by equipping managers, supervisors, technicians, and other key personnel with the tools to communicate instantly and effectively, no matter where they are onsite.

Battery-Operated Alphanumeric Pager

Wireless Push Button Paging

Butler XP

Improve response time

Instantly notify the correct personnel

Reduce the time it takes to locate a supervisor or other personnel

Enhance plant safety with improved communication

Allow staff to multi-task knowing that they can be paged when needed

Enhanced Communication Will Improve Production Throughout Your Facility

Improving communication between workers and their supervisors can dramatically impact productivity and worker safety. Ensure communication across your entire facility with the Butler XP push-button paging system. Workstation employees can instantly notify key personnel such as supervisors, technicians, or maintenance staff of any issues or incidents that occur onsite.

How it works:

1. Mount the Butler XP push-button transmitter wherever notification may be needed.
2. When the button is pressed, a text message is instantly sent to personnel wearing an LRS alphanumeric pager with a specific message Ie. Need assistance in the warehouse.
3. The employee who receives the message, responds accordingly

Butler XP mounted with zip ties

*Battery-Operated
Alphanumeric Pager*

Applications:

- Receiving Dock Notification
- Will Call Notification
- Production Floor
- Parts & Equipment Checkout
- Visitor Notification

Truck Driver Paging

Increase productivity and organization

Increase accuracy of truck deployment

Eliminate wasted time hand-delivering messages to waiting drivers

Prevent traffic jams caused by vehicles parking for unloading

Notify drivers immediately

Provide truck drivers peace of mind while they wait

Improve efficiencies in logistics operations with instant communication

Efficiently controlling the flow of trucks in logistics can result in significant operational gains. LRS' Logistics Paging Solutions allow logistics operators to immediately notify waiting drivers when it's their turn to approach the docking station, no matter where they are located within and near facility grounds. Using alphanumeric messaging, or cell phone notification, drivers can be informed of exactly when and which dock they are to report.

How it works:

1. Hand out pagers to drivers as they enter the station to check in
2. Page them when it is their turn to approach the loading dock or check-in area (direct them to a specific loading dock with alpha messaging)

Alphanumeric Coaster

Warehouse Communications: Forklift Paging & Radios

Improve warehouse productivity

Ensures messages are received in loud environments

Eliminate disruptive and hard-to-hear overhead paging

No Monthly Fees

Instant notification enables quick response times

Effortlessly direct drivers

Contact Your Drivers Instantly From Your PC With NetPage Unlimited

Are you trying to get a message to a forklift driver and can't seem to reach him? LRS supplies 24V flashing pagers that mount to the overhead guard post of a typical forklift. When you want to notify a driver to move something or go to a certain location, the device will begin flashing indicating a message is waiting. After the driver sees the message, it can be cleared with the push of a button.

Forklift Pagers integrate directly into the NetPage Unlimited system so any manager can page a driver directly from their desktop.

2-Way Motorola Radios

CLS Radio (range: ~1 mile)

With large, simple buttons, this versatile radio is great for staff who move around the facility and require 2-way communications. CLS is available in 1 Channel and 4 Channel models.

RDU (range: ~1 mile)

The larger business-class radio from Motorola has increased volume and greater signal strength than the CLS class. If you operate in a noisy facility, the RDU radio will come through loud and clear. Available with 2 Channels for little to no interference.
